

1. The Fundamentals of Lean Six Sigma	27. Cause & Effect / Fishbone Diagrams	53. Hypothesis Testing with Normal Data
2. Meanings of Lean and Six Sigma	28. Process Mapping, SIPOC, Value Stream Map	54. 1 & 2 sample t-tests
3. General History of Lean Six Sigma	29. Failure Modes & Effects Analysis (FMEA)	55. Hypothesis Testing with Non-Normal Data
4. Lean Six Sigma Projects	30. Six Sigma Statistics	56. Mann-Whitney
5. DMAIC	31. Basic Statistics	57. Simple Linear Regression
6. PDCA	32. Use of Excel, Minitab and SigmaXL	58. Correlation
7. Kaizen and Kaizen Events	33. Descriptive Statistics	59. Regression Equations
8. Root Cause Analysis	34. Normal Distributions & Normality	60. Non-Linear Regression
9. Voice of the Customer, and Business	35. Graphical Analysis	61. Multiple Linear Regression
10. Lean Six Sigma Belt Roles	36. Histograms	62. Confidence & Prediction Intervals
11. Defining a Process	37. Box Plots	63. Designed Experiments
12. Critical to Quality Characteristics (CTQs)	38. Measurement System Analysis	64. OFAT
13. Cost of Poor Quality (COPQ)	39. Precision & Accuracy	65. Full Factorial Experiments
14. Pareto Analysis	40. Bias, Linearity & Stability	66. Full Factorial Designs
15. Basic Lean Six Sigma Metrics	41. Gage Repeatability & Reproducibility	67. Statistical Process Control (SPC)
16. Selecting Lean Six Sigma Projects	42. Variable & Attribute MSA	68. Data Collection for SPC
17. Problem Statements	43. Process Capability	69. I-MR Chart
18. Building a Business Case & Project Charter	44. Capability Analysis	70. Xbar-R Chart
19. Project Metrics	45. Concept of Stability	71. U Chart
20. SIPOC	46. Attribute & Discrete Data	72. P Chart
21. The 8 Elements of Waste	47. Hypothesis Testing	73. NP Chart
22. 5S	48. Hypothesis Testing Uses	74. X-S chart
23. Lean Thinking	49. Practical vs. Statistical Significance	
24. Kanban	50. Alpha & Beta Risk	
25. Poka-Yoke (Mistake Proofing)	51. p-values	
26. Process Definition	52. Types of Hypothesis Test
